User Stories for the Seven Requirements

Seven User Stories were created corresponding to the five Functional Requirements and two Non-Functional Requirements. Each User Story represents the requirement from the perspective of the relevant system user

Tasks and Subtasks for Requirements

Tasks and Subtasks were created for the Functional and Non-Functional Requirements to divide the required work into smaller and more manageable activities.

Sprint 1

Selected User Stories were moved from the product backlog into Sprint 1. The sprint was planned with a one-week duration and focused on the core courier request and rider dispatch functionality.

The Active Sprint board shows the selected User Stories progressing through the To Do, In Progress and Done stages. This simulates the Scrum workflow during Sprint 1.

Sprint 1 was completed after the selected User Stories progressed through the Scrum workflow and reached the Done state.

Sprint Burndown Chart

The Burndown Chart shows the amount of remaining work during the sprint as User Stories are completed. It helps compare actual progress with the planned sprint progress and provides an indication of the team's capacity.
